SUMMARY

Senior Frontend Engineer with 9+ years building and modernizing React and Angular applications across regulated and enterprise-scale products. Track record of owning full-lifecycle frontend architecture — evaluation, migration, and delivery — with measurable performance outcomes: First Contentful Paint reduced 2s→0.2s, build times cut 20min→1.5min, and frontend load reduced 30s→5s. Deep expertise in Core Web Vitals optimization, WCAG 2.1 AA compliance, and GDPR-aligned development across healthcare and Fortune 500 environments.

EXPERIENCE

Confluent, an IBM Company

May 2025 – Present

Senior Frontend Engineer II

Remote

- Evaluated and led adoption of Astro to replace the Sphinx-based documentation platform, reducing build times from 10–20 minutes to 1.5 minutes and improving CI/CD feedback loops.
- Own technical architecture and execution for a documentation platform serving 100,000+ weekly visits; direct content strategy and tooling with a team of 8 technical writers.
- Led Python 3.8→3.12 migration across the documentation build pipeline, eliminating deprecated packages and modernizing the dependency stack.
- Define CI/CD standards, component library architecture, and cross-functional engineering practices adopted across documentation and adjacent platform teams.

Hinge Health

Apr 2024 – Apr 2025

Senior Frontend Engineer

Hybrid

- Evaluated and led migration from Gatsby to Astro after identifying performance bottlenecks in the GraphQL + Contentful stack, reducing FCP from ~2s to 0.2s in a HIPAA-regulated healthcare environment.
- Led AWS CloudFront/CDN edge delivery initiative and established Core Web Vitals observability with real-user monitoring (LCP, CLS, FID).
- Owned WCAG 2.1 AA compliance and GDPR/data-privacy-aligned development across the frontend platform.
- Led a 5-person frontend team; maintained a Storybook component library integrated with the design system across patient-facing applications.

Phenom

Aug 2019 – Mar 2024

Product Development Engineer II (PDE I → PDE II)

Onsite

- Reduced frontend load time from ~30s to ~5s across a product serving 5,000+ active users (residual load API-bound).
- Built a React PWA from scratch, cutting load times ~30%; migrated a Chrome extension from vanilla JS to React + TypeScript.
- Led the Angular v9→v15 migration to standalone components across ~500 components with a 12–15 engineer team — built the business case and drove team-wide adoption.
- Introduced pre-commit hooks and documented anti-patterns, reducing PR cycle time; mentored engineers subsequently promoted to senior.
- Delivered WCAG 2.1 AA and GDPR-aligned, multilingual features for Fortune 500 EU clients.

Multiplier Solutions
Application Developer

May 2017 – Aug 2019
Onsite

- Led a 2-person team to build a real-time lead-generating chatbot from scratch, owning stack selection, architecture, and delivery (Node.js, WebSockets, Python/Django).
- Built a campaign decision-tree visualizer using D3.js canvas rendering with right-click context menus; designed a 2NF schema with JSON serialization for message-level queryability.
- Delivered VtigerCRM and Vicalia telephony integration.

SKILLS

Frameworks:	React (Hooks, Redux, RSC), Angular 9–15, Astro, TypeScript, JavaScript ES6+
Architecture:	Micro-frontends, Module Federation, PWA, Component-Based Architecture, Design Systems
Performance:	Core Web Vitals (FCP/LCP/CLS), Lighthouse, Code Splitting, Bundle Analysis, Lazy Loading
Compliance:	WCAG 2.1 AA/AAA, ARIA, GDPR, Data Privacy, Cross-browser Compatibility
Cloud & CI/CD:	AWS (S3, CloudFront), GitHub Actions, Webpack, Vite, Pre-commit hooks
Testing:	Jest, Cypress, React Testing Library, Chrome DevTools
Other:	GraphQL, Contentful, Gatsby, WebSockets, Node.js, Python/Django

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science — JNTU (2013–2017)
AWS Certified Developer – Associate (in progress)
