

Phaneendra Kanduri

Senior Product Engineer - Frontend Architecture | Performance Engineering

Available to relocate to Singapore | Employment Pass sponsorship required | Available from January 2027
phaneendra@9thquadrant.com | 9thquadrant.com | github.com/9thQuadrant | linkedin.com/in/phaneendracharyulu

SUMMARY

Senior frontend engineer with 9 years of experience in frontend architecture, legacy system modernization, and performance engineering across documentation platforms, regulated healthcare, and HR technology. Currently the sole engineer on a documentation platform with 100K+ weekly visits at Confluent, an IBM Company.

Selected impact:

- First contentful paint cut from 2s to 0.2s (lab-measured) at Hinge Health
- Documentation build time cut from 10-20 min to 1.5 min at Confluent (Sphinx to Astro)
- Frontend load time cut from 30s to 5s at Phenom (remaining time is API-bound)

SKILLS

Frontend:	React (Hooks, Redux), Angular 9-15, TypeScript, JavaScript ES6+, Astro, GraphQL, Node.js
Architecture:	Micro-frontends, Module Federation, Design Systems, Storybook, PWA, Service Workers, component-based architecture
Performance:	Core Web Vitals (FCP/LCP/CLS), Lighthouse, code splitting, lazy loading, bundle analysis, AWS CloudFront CDN
Compliance:	WCAG 2.1 AA, ARIA, GDPR, HIPAA, i18n and multilingual delivery
Tooling:	Vite, Webpack, GitHub Actions, CI/CD, Jest, Cypress, React Testing Library, Python, Django, Contentful, Gatsby

EXPERIENCE

Senior Frontend Engineer II, Confluent, an IBM Company

May 2025 - Present (1 yr 6 mos)

- Migrated the documentation platform from Sphinx to Astro, cutting build time from 10-20 min to 1.5 min for a site with 100K+ weekly visits and 8 technical writers.
- Sole engineer on the platform: own architecture, delivery, and technical direction across cross-functional stakeholders.
- Migrated the Python toolchain from 3.8 to 3.12 and maintain component documentation in Storybook.

Frontend Engineer, Hinge Health

Apr 2024 - Apr 2025 (1 yr, layoff)

- Evaluated and introduced Astro to replace the existing stack, reducing lab-measured first contentful paint from about 2s to 0.2s.
- Led the AWS CloudFront and CDN initiative for content delivery.
- Owned WCAG 2.1 AA compliance and GDPR and data-privacy development in a regulated US healthcare environment (HIPAA).
- Built on GraphQL, Contentful, and Gatsby; maintained shared components in Storybook.

Product Development Engineer 1 and 2, Phenom

Aug 2019 - Mar 2024 (4 yrs 8 mos)

- Reduced frontend load time from about 30s to 5s for a product with 5,000+ active users; the residual is API-bound.
- Led the Angular 9 to 12 upgrade, then made the business case for standalone components in Angular 15 and led a 12-15 engineer team through the migration of about 500 components.
- Worked with micro-frontends and Module Federation; built a React PWA with service workers from scratch, cutting load times about 30%.
- Delivered WCAG 2.1 AA across about 500 CRM components, plus multilingual, GDPR-aligned features for Fortune 500 EU clients.
- Introduced pre-commit hooks and documented anti-patterns, reducing PR cycle time; mentored engineers who were promoted to senior level.

Software Engineer, Multiplier Solutions

May 2017 - Aug 2019 (2 yrs 4 mos)

- Led a 2-person team to build a real-time lead-generating chatbot from scratch (Node.js, WebSockets), owning stack selection, architecture, and delivery.
- Built a D3.js canvas graph visualization and delivered VtigerCRM and Vicidial telephony integrations (Python, Django).

OSS AND WRITING

Astro documentation contributions: github.com/withastro/docs/pulls?q=author%3A9thQuadrant | Technical blog: dev.to/9thquadrant

EDUCATION

B.Tech, Computer Science, JNTU Kakinada (2013 - 2017)
