

PHANEENDRA KANDURI

Senior Product Engineer - Frontend Architecture | Performance Engineering

Visa sponsorship required | Available from January 2027 | 1 month notice period

phaneendra@9thquadrant.com | 9thquadrant.com | github.com/9thQuadrant | linkedin.com/in/phaneendracharyulu

Summary

Senior Frontend Engineer with 9 years of experience building accessible, high-performance product interfaces and developer-facing tooling across regulated and high-scale environments. Specializes in frontend architecture, reusable component systems, and backend-for-frontend integration connecting React and TypeScript interfaces to REST and GraphQL services.

Selected impact:

- Build times: 10-20 minutes to 1.5 minutes - led Sphinx-to-Astro documentation platform migration (Confluent)
- First Contentful Paint: ~2s to 0.2s - evaluated and introduced Astro to replace existing stack (Hinge Health)
- Frontend load time: ~30s to ~5s - built React PWA from scratch for a Fortune 500 HR platform with 5,000+ active users (Phenom)

Skills

- **Frontend:** React (Hooks, Redux), TypeScript, JavaScript ES6+, Angular 9-15, Astro, HTML5, CSS3
- **Architecture:** Component-based architecture, design systems, micro-frontends, Module Federation, reusable UI component libraries
- **Performance and accessibility:** Core Web Vitals (FCP, LCP, CLS), Lighthouse, bundle analysis, code splitting, lazy loading, WCAG 2.1 AA, ARIA
- **Backend and integration:** Node.js, RESTful APIs, GraphQL, backend-for-frontend patterns, Python, Django
- **Tooling and delivery:** CI/CD (GitHub Actions), Storybook, Jest, Cypress, React Testing Library, AI-augmented development (Claude Code, Cursor)

Experience

Senior Frontend Engineer II | Confluent, an IBM Company

May 2025 - Present (1 yr 6 mos)

- Own frontend architecture for a documentation platform serving 100,000+ weekly visits as the sole engineer, leading a Sphinx-to-Astro migration that cut build times from 10-20 minutes to 1.5 minutes.
- Lead cross-functional technical strategy and system design direction, partnering with 8 technical writers on platform reliability, content workflows, and developer tooling.
- Build and ship reusable, design-system-aligned UI components, applying AI-augmented development practices (Claude Code) to increase delivery velocity.

Senior Frontend Engineer | Hinge Health

Apr 2024 - Apr 2025 (1 yr, layoff)

- Evaluated and introduced Astro to replace the existing stack, reducing lab-measured First Contentful Paint from approximately 2s to 0.2s.
- Led an AWS CloudFront/CDN initiative to improve content delivery performance and reliability.
- Owned WCAG 2.1 AA compliance and GDPR-aligned data-privacy development in a regulated US healthcare environment (HIPAA), integrating with GraphQL, Contentful, and Gatsby.
- Built and maintained reusable, accessible UI components and Storybook-documented patterns for cross-team reuse.

Senior Frontend Engineer (PDE 1 to PDE 2) | Phenom

Aug 2019 - Mar 2024 (4 yrs 8 mos)

- Built a React PWA from scratch for a Fortune 500 HR platform serving 5,000+ active users, reducing frontend load time from approximately 30s to 5s through code splitting, lazy loading, and service worker caching.
- Led the Angular 9-to-15 upgrade across approximately 500 components with a 12-15 engineer team; identified standalone components in Angular 15 as an architectural improvement and built the business case for the upgrade.
- Migrated a Chrome extension from vanilla JavaScript to React with TypeScript, introducing micro-frontend patterns and Module Federation for independent feature deployment.
- Delivered multilingual, WCAG 2.1 AA-compliant, GDPR-aligned features for Fortune 500 EU clients, including accessible routing and screen-reader-tested components.
- Introduced pre-commit hooks and documented anti-patterns to reduce PR cycle time; mentored engineers who were subsequently promoted to senior level.

Frontend Engineer | Multiplier Solutions

May 2017 - Aug 2019 (2 yrs 4 mos)

- Led a 2-person team to build a real-time lead-generating chatbot from scratch, owning stack selection, architecture, and delivery across Node.js, WebSockets, and a Codelgniter/MySQL backend.
- Built a D3.js canvas-based campaign decision-tree visualization with right-click context menus, backed by a 2NF schema with JSON serialization for message-level queryability; delivered VtigerCRM and Vicidial telephony integrations.

Open Source and Writing

- 3 merged pull requests to the Astro framework's official documentation (SSR clarity): github.com/withastro/docs/pulls?q=author:9thQuadrant
- Technical blog on Dev.to: dev.to/9thquadrant

Education

B.Tech, Computer Science - JNTU Hyderabad (2013-2017)
